

Established 1996
Registered Address: Hamburg

Executive Board

Chairman:	Nils Stoll
Deputy Chairman:	Anja Ohlen
Vorstand:	Kolja Schmidt-Teuteberg
Honorary Chairman:	Uwe Gröning
CEO:	Sebastian Corth

Membership The more than 120 members of HANSE-AEROSPACE e.V. include suppliers from all areas of the aviation industry and many areas of aerospace

- Manufacturers
 - maintenance companies
 - development companies
 - engineering service providers
 - personnel service providers
 - documentation service providers
 - consulting companies
 - training institutes
 - colleges and universities
-

Short portrait HANSE-AEROSPACE e.V. is the largest German association of small and medium-sized enterprises (SMEs) in the aerospace industry. Hanse-Aerospace member companies employ 14,000 employees, around fifteen per cent of all specialists working in the German aerospace industry. Together, the member companies have an annual turnover of around 11 billion euros, of which around 1.5 billion is generated in the aerospace industry.

The advantages of membership include

- pooling of interests and resources,
- inter-company cooperation,
- joint product development,
- lively exchange of experience and information,
- participation in the working groups,
- greater economic power through the joint and coordinated presence of SMEs.

In working groups on production/development/processes (PEP) and engineering services, as well as personnel and further training, the members develop solutions for requirements arising from current developments.

The main tasks of HANSE-AEROSPACE e.V. include

- advising members
- coordinating the association's activities
- promoting communication and cooperation between member companies
- advising state governments
- representing interests vis-à-vis state governments
- organising joint stands at trade fairs around the world via Hanse-Aerospace Wirtschaftsdienst GmbH
- actively promoting European and transcontinental relations

This last aspect is becoming increasingly important for SMEs as aircraft manufacturers focus their cooperation with industrial partners on globally active core suppliers. The aim is to create a Europe-wide competence network of aerospace suppliers to work together as equal partners with the large companies in this future-oriented industry in the long term and to be appropriately involved in the work packages tendered by the manufacturers. This approach is complemented by regular contacts between the association and regional SME associations in the UK, the Netherlands, France, Spain, Italy and overseas to exchange information on infrastructure, research, training and technology development issues. This transnational approach is a focal point of the association's activities, as a Europe-wide concentration of forces is of existential importance for the aircraft supply industry. For this reason, Hanse-Aerospace organises joint trade fair stands to visualise its global presence.
